

**METHOD AND SYSTEM IN AN ELECTRONIC SPREADSHEET FOR
PERSISTENTLY COPY-PASTING A SOURCE RANGE OF CELLS ONTO
ONE OR MORE DESTINATION RANGES OF CELLS.**

Abstract

5 A system and method is disclosed for persistently copying and
pasting a source range of cells of a multidimensional spreadsheet
onto one or more destination ranges of cells. When the source
cells are first copied and pasted, a persistent association is
made between the source cells and the destination cells.
10 Thereafter, whenever a cell in the source range is updated, the
corresponding cells in the destination range are updated
automatically.
